

New evidence points to a previously unknown culprit in the world's alarming obesity levels: "Obesogens"

Published evidence has shown that diet and activity level are not the only factors in the rise of obesity that has been seen in the last 100 years. Toxins invading every aspect of modern life act as chemical 'obesogens' that may alter human metabolism and predispose some people to gain weight. Fetal and early-life exposures to certain obesogens may alter some individuals' metabolism and fat-cell makeup for life. Other obesogenic effects are linked to adulthood exposures.

"It seems clear that to win the battle against obesity, eliminating our exposure and body burden of toxic obesogens must be our first step." - Dr. Stewart Lonky

AVINI Health's scientists have the solution with our new product TrimScience™!

Turn over to learn how it works!

Not your fault.

How does TrimScience™ Work?

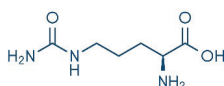

The ingredients of TrimScience™ aid in weight management by burning fat (thermogenesis), blocking carbohydrate absorption (alpha-amylase inhibition), preventing the creation of new fat (lipid biosynthesis), appetite suppression (satiety) and systemic detoxification, including removal of obesogens.

Other ingredients make weight management easier by preventing the jitteriness usually experienced by coffee drinkers and aiding in mood enhancement to give users a feeling of well-being. All of these together make for a unique weight management and detoxification experience.

What makes up the Proprietary Botanical Blend in the TrimScience™ products?

Guarana Seed Extract: a healthy source of natural caffeine that promotes energy, thermogenesis (fat burning) and focus.

Citrulline: a natural amino acid that aids in blood sugar utilization and promotes healthy circulation.

Garcinia Cambogia: has been used in weight loss products for decades. It contains HCA (Hydroxy Citric Acid) which prevents the body from creating new fat, thus acting as a 'fat blocker'.

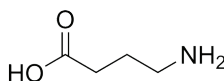

Ginseng Extract: a natural adaptogen that helps reduce stress, increase energy and stabilize blood sugar levels.

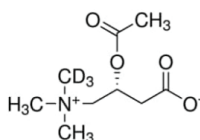

Mucuna Pruriens Extract: a natural legume that is high in the neurotransmitter L-Dopa as well as trace amounts of serotonin. This has shown to clinically promote satiety and appetite suppression.

Green Tea Extract: a healthy source of caffeine for thermogenesis as well as powerful antioxidants (ECGC). Green tea extract has been clinically shown to aid in healthy weight management and heart health.

GABA: a neurotransmitter that blocks impulses between nerve cells in the brain. It helps to provide mental focus and reduces the 'jitteriness' normally created by weight loss products.

N-Acetyl-L-Carnitine: a natural amino acid that aids in the transport of fats into the mitochondria where they can be 'burned' for energy. It can cross the blood brain barrier and has been shown to improve cognitive function and focus.

Phaseolamin: an extract from white kidney beans that blocks the function of alpha-amylase: an enzyme that normally breaks down carbohydrates in the digestive tract; thus acting as a 'carb blocker'. This reduces the caloric intake of carbohydrates as well as stabilizing blood sugar levels.

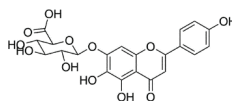

Notoginseng Extract: a natural extract clinically found to manage fat burning (lipolysis) and fat production (adipogenesis) in the body; leading to reduced production and deposition of body fat.

Zeolite: AVINI'S micronized and activated clinoptilolite zeolite to aid in the removal of toxins and heavy metals; thus potentially reducing obesogens to result in healthier weight loss.

Lions Mane Mushroom: a mushroom that has been clinically proven to act as an antioxidant, anti-inflammatory and to improve insulin sensitivity – leading to reduce blood sugar levels.

Breviscapine Extract: a natural extract historically used to promote healthy circulation and mental focus.

No Token Ingredients!

All of the ingredients in TrimScience™ are at levels equal to those in the studies that prove its effectiveness.

When should I use TrimScience™?

TrimScience can be used any time that you would normally drink a cup of coffee, Matcha tea or cocoa. To maximize the benefits, it's best to drink TrimScience around meal times.
